

CARL SEVILLE JOINS EXPERT GROUP OF ADVISORS ON NEW RESIDENTIAL GREEN BUILDING WEBSITE

Carl Seville, a green remodeling consultant from Decatur, is among a group of 15 green building industry experts serving as advisors for www.GreenBuildingAdvisor.com, a new residential green building website launched by BuildingGreen, LLC.

Seville and the other green building advisors will work with the website to answer questions, write columns and articles, take part in seminars and videos, and serve as advisors in other capacities. In addition, Seville's blog, www.greenbuildingcurmudgeon.com, is now hosted on GreenBuildingAdvisor.com.

The new website is described as an online suite of expert advice, proven construction details, and real-world tools on residential green building and remodeling for residential architects, builders, remodelers, and highly-engaged homeowners.

GreenBuildingAdvisor.com is a fee-based information service with members paying a annual or monthly fee for access. In addition to the fee-based information, the website includes extensive free content, including product listings, case studies, news, blogs, a community forum, and more. In addition to online delivery, a monthly print newsletter is being provided to members.

BuildingGreen, LLC has been providing the building industry with quality information on sustainable design and construction since its founding in 1985. Its publications include *Environmental Building News*, the *GreenSpec* directory of green building product and the *BuildingGreen Suite* of online resources. In early 2008, Building Green entered into a partnership with The Taunton Press.

Carl Seville of Seville Consulting is a green builder, educator, and consultant on sustainability to the residential construction industry. After a 25-year career in the remodeling industry, he has dedicated himself in recent years to advancing residential green building and remodeling by consulting with, speaking to, writing for, and training industry professionals, and by certifying homes under the LEED, EarthCraft, NAHB, and Energy Star programs. Through Seville Consulting, he offers his expertise to homeowners, contractors, and manufacturers throughout the country working from the company's office in the metro Atlanta area. He has won more than 100 industry awards, including several of the top awards in green building, and he has held numerous leadership positions in the building and remodeling industries. More information about Seville Consulting and its services is available on the internet at www.sevilleconsulting.com.
